# What is Hookpict?

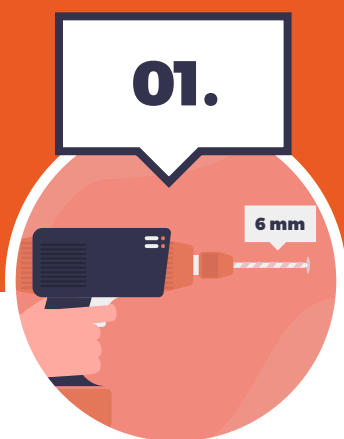

**Hookpict** is a component made of steel with flexible characteristics that incorporates, in a single piece, the functions of the "*wall-plug*" and the "*hook*" or "*angled screw*" normally used for hanging pictures or other decorative items. Thus, for the general public, it presents a very interesting opportunity since it simplifies what usually requires two separate elements into a single piece.

## How it works?

The dimensions of **Hookpict** are suitable for 6mm holes. In the following images we explain the process of fixing them into the wall.

**01.**

Drill a **6mm hole** in the wall.

**02.**

**Insert the Hookpict** using its flexibility.

**03.**

**And it's ready!**  
You can now hang your pictures.

## Colours

**Blue**

**Gold**

**Rose Gold**

**Steel**

## Surfaces

**Plaster**

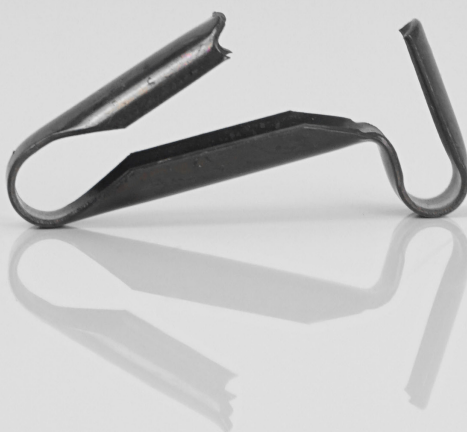

**Wood**

**Concrete**

**Marble**

Available in **different colours** so that you can match them perfectly to your rooms.

**They work on any surface.** Thanks to the material used, it means they can be placed in any position.

## Properties

**LOAD RESISTANCE.** Thanks to its design, it can support a weight of up to 25 kg. Thus, it can be used to hang various weights.

The **ELASTICITY** of the material allows the stem, shaped as an open clamp, to gradually close as it is inserted into a hole.

**REUSE.** Its elastic characteristics and its shape do not alter with use. This means it can be reused.

**SAVINGS** in material and time. There's no need to use a "hook". All you need to do is make a 6mm hole, insert Hookpict, and it's job done!

“

**A great advantage of Hookpict is how fast it is to put into position.**

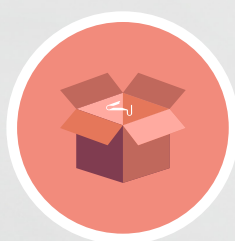

“

Save time and  
effort with  
Hookpict.

## Distribution

We distribute Hookpict in **bulk or in packs\***. Contact us to receive more information about product distribution.

*\* Units to be determined*
